What's New in the Easy Clone Detective?

Easy Cloner is a lightweight, yet powerful Windows software that is able to duplicate and clone any file (folder) and any folder of your hard drives with a single mouse click. There are other features that you will get when you install it. First of all, the application will search all Windows partitions for duplicate files or folder in order to clean the free space on your drives. The second feature is to create an image of any folder. The main purpose of this software is to make copies of any folders. The program will duplicate all files or folders on your system or on any Windows partition. You can create any number of copies of your files or folders. This application is able to search your drives for duplicate files. Clone folders: The application is able to duplicate any folders on your drives. This feature is very important as it is often necessary to duplicate folders or files in order to free space on your system. You can clone any folder, including nested ones. You don't have to worry about duplicate files inside a folder, only the folder itself will be duplicated. You can create a clone of any folder of your hard drives, including the system folder. The program will scan all Windows partitions for duplicate files or folders. This feature will ensure you a better performance as the application will get more free space on your hard drives. Duplicate any file: You can duplicate any file on your system or on any Windows partition. The software scans all folders and Windows partitions for duplicate files. This means that it will be able to clone all files that are stored on your drives. If you find duplicate files or folders in any location, then you can delete them with the help of the application. Duplicate all folders: The program will be able to duplicate any folder. The application will first scan all Windows partitions for duplicate files or folders. You can set a folder as the default folder to be duplicated. You can set any folder as a default folder, including the system folder. The application will then clone that folder. The number of folders that will be duplicated will be displayed in the application. Create Image of any folder: This is the most useful feature of the program as it will allow you to create an image of any folder. The application will search all Windows partitions for duplicate files or folders. You can set a folder as a default folder to be duplicated. You can set any folder as a default folder, including the system folder. The application will clone that folder. It will save the resulting image to a specified location. You can modify the size of the resulting image. Clean up duplicates: Once you select a folder that will be duplicated, the application will automatically remove all duplicate files or folders. It will scan all files and folders and displays the results. You can delete any duplicate files or folders and save the files or folders to your hard drives.
