What's New In?

- This package contains the same Microsoft MPI (MS-MPI) installer that accompanies the HPC Pack 2012 release. - HPC Pack 2012 MS-MPI Redistributable Package was designed in order to enable you to develop and run MPI applications without having to set up an HPC Pack cluster. Please refer to the HPC Pack 2012 SDK for information on running small multi-process MPI jobs through the command line, without using the HPC Pack user interface. - You may also redistribute this MS-MPI installation package with your own applications, to facilitate having an application that can run on a stand-alone workstation and easily take advantage of an HPC Pack 2012-based cluster. Please refer to the license agreement for additional details. Please note: this package differs from the standalone MS-MPI, which is available separately from Microsoft. The standalone MS-MPI is a redistributable package that enables you to install and run MPI applications on a single system. This package enables you to install MPI applications in a single cluster node as a full installation. Description of features: - This package contains the same Microsoft MPI (MS-MPI) installer that accompanies the HPC Pack 2012 release. - HPC Pack 2012 MS-MPI Redistributable Package was designed in order to enable you to develop and run MPI applications without having to set up an HPC Pack cluster. Please refer to the HPC Pack 2012 SDK for information on running small multi-process MPI jobs through the command line, without using the HPC Pack user interface. - You may also redistribute this MS-MPI installation package with your own applications, to facilitate having an application that can run on a stand-alone workstation and easily take advantage of an HPC Pack 2012-based cluster. Please refer to the license agreement for additional details. Installation procedure: 1. Unzip the contents of the MS-MPI_install.zip into a new folder. This folder is where you will install MS-MPI and its components. You can choose to install the software to any location on your machine, although we recommend a location on the hard drive that has at least 2.5GB of free space. 2. Double-click on MS-MPI_setup.exe. 3. Click Next to continue. 4. Click I Agree to accept the terms of the license agreement. 5. Click Next again to continue. 6. Click Install to install the MS-MPI Redistributable package. 7. Wait for the installation process to complete. 8. Click Finish to complete the installation. Note: - This package differs from the standalone MS-MPI, which is available separately from Microsoft. The standalone MS-MPI is a redistributable package that enables you to install

System Requirements For HPC Pack 2012 MS-MPI Redistributable Package:

You will need to be a member of the beta and be registered for the Sub-Games Beta. All games need to be redeemed for in-game currency using the Sub-Games Beta. Game-specific requirements and more information on each game can be found in the FAQ. Steam Workshop Games that have a Steam Workshop do not need a steam account to use the Sub-Games Beta. The beta should allow you to import your existing works into your Sub-Games Beta account. If your Steam account is not already linked with Sub-Games
