ShowPorts is currently at version 2.3.5 and can be found at: There are a few issues and things to be aware of when viewing the information from ShowPorts. First, the port names are case sensitive. When viewing the COM port, if you are having trouble with the port, make sure you click on the "Name" column. This will make sure you are viewing the name of the port as it appears on the device rather than it's label or name on your computer. Also, when looking at the information from ShowPorts it is possible to have one or more ports listed twice. There is no way to delete this information, it is just there. A small amount of a new computer will be required to run ShowPorts. However, ShowPorts is a completely portable application so you can run it from a thumb drive, portable CD or an external hard drive. You can also copy and run it from your Desktop PC if you wish. This is a lightweight application so the Computer RAM should not be an issue. ShowPorts requires Windows XP, Windows 2000 or Windows Vista.
