The new standard to join the International Organization for Standardization (ISO) is to follow the unification model. This means that ISO will combine its two existing standards-based bodies—the International Standards Organization (ISO) and International Electrotechnical Commission (IEC)—by merging the two organizations in a single authority. This way, the ISO will no longer have to work against the competition of other standards organizations such as the International Telecommunications Union (ITU). This merger will produce a much more unified body that will have the power to manage all international standards. At the same time, this merger is expected to double the efficiency of the ISO. By combining the two bodies, the ISO will be able to deliver more efficient and standardized work. For example, it will allow ISO to consolidate all its standards activities into one authority. So that allows ISO to deliver more and more efficient standards to the public. The third reason for the merger is that by merging ISO and IEC together, the ISO will gain a share of the more than \$55 billion worth of IEC's financial support, which would make it more attractive to all 1d6a3396d6

TeXnicCenter [Win/Mac]

TeXnicCenter is a PDF reader, compiler and a console interpreter for the powerful TeX document preparation system. The program is intended for people who want to start writing or editing their own documents in the TeX language. TeXnicCenter is free, cross-platform software. The program has been tested on Windows, Mac OS and Linux operating systems. Related programs: Papers, A program for authoring and compiling IEEE templates and papers TeXShop, A latex compiler and IDE, LaTeX and Metapost Tool PDFLaTeX, LaTeX compiler for Windows MathType 1.1, Type of the equation processor MathJax, Provides inline math typesetting via LaTeX or MathML Zotero, Desktop reference manager for the internet Zotero Agent for Mac OS X, Zotero's desktop reference manager for the Mac TeXtoPDF PDF Converter is a free software tool to convert.tex (TeX) documents to PDF documents. All the major editing features of TeXnicCenter are supported, including line numbering, complex math, text wrapping, auto-completion, etc. There are many reasons to convert your tex files to pdf documents. PDF documents are easy to create and read. They support fonts, complex mathematics, images, etc. They do not lose images.
