Q: How to get all the properties of a class which implements the interface from within a static block? I have an interface with some methods that a class implements. Now I want to get all the methods of that class from within a static block. Here is the code of my test class:

```
public class MyInterface implements IMyInterface { private int a, b, c; public int getA() { return a; } public int getB() { return b; } public int getC() { return c; } } And I have a static block: public class MyStatic { public static void main(String[] args) { MyInterface intObject= new MyInterface(); for(Method method : intObject.getClass().getDeclaredMethods()) { System.out.println(method); } } } Now I expect to get the three methods from MyInterface, but I get no methods. Any ideas how to get them from the interface? A: getClass() just returns the Class object for the current object, not the Class object for the Class object, which is what you need. So instead of MyInterface intObject= new MyInterface(); use MyInterface intObject = new MyInterface().getClass(); and then it will work as expected. A: How about: Class intObjectClass = MyInterface.class; for(Method method : intObjectClass.getDeclaredMethods()) {
```
