yet. Here's a slightly more comprehensive example to illustrate the basic mechanics of it: As soon as you click on this link, it will put the title of the blog post into the pre element. But what if you wanted the URL of the blog post to be included in the ? You could do that like this:

Then, when you open your browser's address bar, you'll see that it says "Blog post titled "The New Internet"". This is great for having a pretty, informative title, but the title of the link is missing the URL. It is called a "self-closing" title. This may come as a bit

The above problem has been known for a long time. In early days, it was solved by lighting a fire in a region of high wind, but such solutions may be unsuitable, particularly in a built up area where fire is prohibited. In recent years, with the spread of high pressure gas pipes, a hot water pipe-gas valve and a central heating pipe-gas valve have been widely used. Thus, such gas valves are extremely easy to use. However, the above problem still exists in many building areas. The present invention relates to a gas valve for a gas pipe in which the gas pipe is connected to the gas valve and the safety valve is connected to

the gas valve. In the prior art, in a connection structure between a gas pipe and a gas valve, a gas pipe is provided with a gas valve, and a safety valve is connected to the gas valve. This structure cannot meet the requirement of safety. Particularly, in a house, there is a danger that, if the user does not notice the dangerous state of an accident in time and allows a gas flame to get out of control, a house fire may occur. Thus, in the prior art, there is a high danger of fire. The present invention is directed to provide a gas valve for a gas pipe and a connection structure between the gas pipe and the gas valve, which can meet the requirement of safety. A gas valve for a gas pipe according to the present invention includes a pipe having a lower end portion and an upper end portion, a gas outlet provided in the lower end portion of the pipe, and a fixing means for fixing the pipe to a place. A gas valve includes a first body, which includes a first chamber for gas and an actuating member disposed to open and close the first chamber. A second chamber is
